

SpellTHelp Privacy Policy

Last updated: July 30, 2026 **Effective date:** July 30, 2026

SpellTHelp is published by **GadgetHeads LLC** ("GadgetHeads," "we," "us," or "our"). SpellTHelp is a word-game assistant for iPhone: you import a screenshot of your game board, and the app recognizes the letters and suggests strong plays. This policy explains what SpellTHelp does and does not do with your information. The short version: **SpellTHelp has no accounts and no servers, and your board screenshots are processed entirely on your device.**

Summary

- SpellTHelp does **not** have user accounts and does **not** operate any server that receives your data.
- Board screenshots you import are read and recognized **on your device**.
- We do **not** upload your screenshots, recognized boards, or word suggestions to a GadgetHeads LLC server.
- We use **no** third-party analytics, advertising, or tracking SDKs.
- SpellTHelp does **not** track you across other apps or websites.

Information SpellTHelp handles

Everything below stays on your device. None of it is sent to us or to any third party.

- **Board screenshots you import.** When you choose a screenshot, SpellTHelp reads that image to recognize the board and available letters. The image and the recognized board are processed on your device.
- **App data stored on your device.** To recognize boards and show results, SpellTHelp may write image and recognition data to its own local storage on your device. This data stays in the app's storage and is not uploaded.
- **App settings and preferences.** For example your chosen options and display preferences, stored in the app's local settings (iOS UserDefaults / `@AppStorage`).
- **Purchase status.** A local flag indicating whether SpellTHelp Pro is unlocked (see Purchases).

Photo library access

SpellTHelp requests photo access only so you can pick a game-board screenshot to import. The app reads the image you choose in order to recognize the board. It does not browse, catalog, or upload your photo library, and it accesses only the screenshot you select. You can review or change this permission at any time in the iOS **Settings > Privacy & Security > Photos** screen.

On-device recognition

SpellTHelp recognizes the letters and layout of your board using Apple's on-device **Vision** framework. Recognition runs entirely on your device. Your screenshots and the recognized board are **not** sent off the device to be processed.

Sharing

If you choose to share your results, SpellTHelp uses the standard iOS share sheet, and the content goes only where you send it (for example, Messages or Notes). SpellTHelp does not upload or post anything on your behalf.

Purchases

SpellTHelp offers an optional one-time in-app purchase, **SpellTHelp Pro**. Purchases are processed by **Apple** through the App Store using StoreKit. SpellTHelp does not see or store your payment information. Apple's handling of your purchase is governed by Apple's Privacy Policy. SpellTHelp records only a local flag indicating that Pro is unlocked; entitlement status is verified through Apple.

Information we do NOT collect

- We do not collect your name, email address, or contact information (the "Contact Support" link simply opens your own mail app).
- We do not collect device identifiers for tracking.
- We do not use analytics or crash-reporting SDKs.
- We do not use advertising or third-party tracking.

Tracking

SpellTHelp does **not** track you as defined by Apple's App Tracking Transparency framework. We do not link your data with third-party data for advertising, and we do not share your data with data brokers.

Third-party word games

SpellTHelp is an independent tool and is not sponsored by or affiliated with any third-party word game. Word suggestions are provided for entertainment and convenience; their validity and score can depend on the rules and dictionary used by the game you are playing.

Children's privacy

SpellTHelp is a general-audience app and is not directed to children under 13. It does not knowingly collect personal information from children.

Changes to this policy

If we change this policy, we will update the "Last updated" date above and, where appropriate, the effective date.
